PROJECTS

Eco Travel Planner
Application that helps travelers find sustainable travel options, calculates the estimated carbon emissions generated from their travel itinerary and shows sustainable travel options such as hike and bike trails.

Deployed at: https://omar-ahm.github.io/Eco-Travel-Planner/

Team Profile Generator
The task was to take the given starter code and convert it into a working Node.js command-line application. This application will take in information about employees on a software engineering team, then generate an HTML webpage that displays summaries for each person.

Deployed at: https://github.com/omar-ahm/WK12-Team-Profile-Generator

PROFESSIONAL EXPERIENCE

EDUCATION

CERTIFICATES

EdEx Trilogy Bootcamp
Frontend Web Development

README.md Generator
This project is built for users to dynamically generate a README.md file for future GitHub projects, it is designed to take the leg work out of having to create a README.md file from scratch everytime and prompts the user step-by-step.

Deployed at: https://github.com/omar-ahm/WK11-Professional-README-Generator

Weather Dashboard
Create a weather dashboard with form inputs.

When a user searches for a city they are presented with current and future conditions for that city and that city is added to the search history

When a user views the current weather conditions for that city they are presented with:

The city name
The date
An icon representation of weather conditions
The temperature
The humidity
The wind speed

Deployed at: https://omar-ahm.github.io/WK8-Weather-Dashboard/
